ABOUT ME

With over two years of experience, I have developed mobile applications as a Flutter developer. Both front-end (Flutter, Dart) and back-end (PHP, MySQL, Firebase) are my areas of expertise. I have successfully deployed multiple applications on CH Play and the Apple Store. Additionally, I have experience integrating third-party APIs such as Grab and Nhattin. I am eager to learn, very adaptive, and always up for a challenge.

EDUCATION

Công Nghệ Thủ Đức

Information Technology

07/2018 - 06/2021
